

## Course Syllabus: Biochemistry and Metabolic Engineering - PS 302

<b>Division</b>	Biological and Environmental Sciences & Engineering Division
<b>Course Number</b>	PS 302
<b>Course Title</b>	Biochemistry and Metabolic Engineering
<b>Academic Semester</b>	Spring
<b>Academic Year</b>	2016/2017
<b>Semester Start Date</b>	01/22/2017
<b>Semester End Date</b>	05/18/2017
<b>Class Schedule</b> (Days & Time)	02:30 PM - 04:00 PM   Sun Wed

Course Information	
<b>Comprehensive Course Description</b>	The course will provide an overview on cell metabolism and biochemical pathways, covering primary, lipid and isoprenoid metabolism. This will be followed by an introduction of the concept of Metabolic Engineering, highlighting key factors that regulate natural and synthetic pathways. Examples for engineered pathways will be presented and discussed in depth. The course also includes practical introduction in metabolites analysis.
<b>Course Description from Program Guide</b>	This course provides in depth knowledge in major topics of plant biochemistry and an introduction to metabolic analysis.
<b>Goals and Objectives</b>	The student will get a deep understanding of key metabolic processes and a comprehensive overview on achievements and bottlenecks of metabolic engineering.
<b>Required Knowledge</b>	Profund basis knowledge of biochemistry and strong interest in metabolic processes.
<b>Reference Texts</b>	Reviews and primary literature will be assigned during the semester. For background on specific topics, the following books are recommended. <b>Stephanopoulos, G.N., Aristidou, A.A., Nielsen, J.</b> (2000). <i>Metabolic Engineering: Principles and Methodologies</i> . Academic Press. <b>Del Carmen Cortassa, S., Aon, MA</b> (2011) <i>An Introduction to Metabolic and Cellular Engineering</i> (2nd Edition). World Scientific. <b>Berg, J.M., Tymoczko, J.L., Gregory J. Gatto Jr. G.J., Stryer, L.</b> (2015) <i>Biochemistry</i> (8th Edition). Macmillan Learning <b>Heldt H-W</b> (2011) <i>Plant Biochemistry</i> . Fourth Edition. Elsevier Academic Press. <b>Buchanan, B., Grussem, W., Jones, R.</b> (2015) <i>Biochemistry &amp; Molecular Biology of Plants</i> , John Wiley & Sons.

<b>Method of evaluation</b>	<b>70.00%</b> - Presentation <b>10.00%</b> - Attendance <b>20.00%</b> - Attendance and Participation
<b>Nature of the assignments</b>	Assigned reading and paper presentation.
<b>Course Policies</b>	Unexplained absences for any class will result in point being deducted from the final grade
<b>Additional Information</b>	

<b>Tentative Course Schedule</b> <i>(Time, topic/emphasis &amp; resources)</i>		
<b>Week</b>	<b>Lectures</b>	<b>Topic</b>
1	Sun 01/22/2017 Wed 01/25/2017	Introduction and Overview of Biochemical Pathways
2	Sun 01/29/2017 Wed 02/01/2017	Primary Metabolism – Respiration and Photosynthesis
3	Sun 02/05/2017 Wed 02/08/2017	Lipid and Isoprenoid Metabolism
4	Sun 02/12/2017 Wed 02/15/2017	Regulation of Metabolic Pathways, Compartmentalization, Enzyme kinetics
5	Sun 02/19/2017 Wed 02/22/2017	Feed-back inhibition, Metabolon, Scaffolding
6	Sun 02/26/2017 Wed 03/01/2017	Rate Limiting Step, Pathway Engineering and Flux Analysis
7	Sun 03/05/2017 Wed 03/08/2017	Presentations
8	Sun 03/12/2017 Wed 03/15/2017	Metabolic Engineering: Increasing Nutritional Quality
9	Sun 03/19/2017 Wed 03/22/2017	Metabolic Engineering: Increasing Nutritional Quality
10	Sun 03/26/2017 Wed 03/29/2017	Metabolic Engineering: Production of Drugs and Chemicals
11	Sun 04/02/2017 Wed 04/05/2017	Presentations
12	Sun 04/09/2017 Wed 04/12/2017	Enhancing Photosynthesis Efficiency
13	Sun 04/16/2017 Wed 04/19/2017	Nitrogen Fixation and Biofuel Production
14	Sun 04/23/2017 Wed 04/26/2017	Presentations
15	Sun 04/30/2017 Wed 05/03/2017	Metabolism of Plant Hormones
16	Sun 05/07/2017 Wed 05/10/2017	Examples for Metabolic Engineering and Metabolites Analysis (Practical)
17	Sun 05/14/2017 Wed 05/17/2017	Examples for Metabolic Engineering and Metabolites Analysis (Practical)
18		NA
