

## Course Syllabus: Advanced Plant Molecular Genetics - PS 303

<b>Division</b>	Biological and Environmental Sciences & Engineering Division
<b>Course Number</b>	PS 303
<b>Course Title</b>	Advanced Plant Molecular Genetics
<b>Academic Semester</b>	Spring
<b>Academic Year</b>	2016/2017
<b>Semester Start Date</b>	01/22/2017
<b>Semester End Date</b>	05/18/2017
<b>Class Schedule</b> (Days & Time)	10:30 AM - 12:00 PM   Sun Tue

Course Information	
<b>Comprehensive Course Description</b>	PS303 course will cover advanced topics in the key biological processes of plants in a molecular, genetics, and genomics context. The course will provide a broad coverage of the current concepts and techniques of plant molecular genetics and genomics and their application to crop productivity and improvement. Special emphasis will be placed on recent publications in the research of these topics involving gene regulation, plant growth and development, abiotic stress, hormones, nutrition, and epigenetics.
<b>Course Description from Program Guide</b>	This course will cover the key biological processes of plants in a molecular, genetics, and genomics context. The course will provide a broad coverage of the current concepts and techniques of plant molecular genetics and genomics and their application to crop productivity and improvement. Special emphasis will be placed on recent publications in the research of these topics involving plant growth and development, abiotic/biotic stresses, metabolism, hormones, nutrient relations, and epigenetics.

<b>Goals and Objectives</b>	Students will be able to describe current concepts in advanced plant molecular genetics and genomics and explain the genetics and molecular basis underlying plant growth, reproduction, development, nutrition, cell signaling, abiotic stress adaptation. Students will be able to develop critical thinking, analysis and evaluation skills in applying knowledge in the class to solve real research questions. Students will be able to develop skills and expertise in researching literature as well as reading, writing and evaluating research publications. This course will also cover the understanding and appreciation of the connections of plant molecular genetics and genomics to society.
<b>Required Knowledge</b>	Prerequisites: B209 Molecular Genetics
<b>Reference Texts</b>	Students will be provided with a list of selected recent research papers and reviews to cover the topics in PS303 course. Students are encouraged to refer to Biochemistry and Molecular Biology of Plants, 2nd Edition, textbook to enrich their background in multiple topics.
<b>Method of evaluation</b>	<b>20.00%</b> - Group Project(s) <b>30.00%</b> - Written report <b>30.00%</b> - Scientific review article presentation <b>20.00%</b> - Course Project(s)
<b>Nature of the assignments</b>	A. Class Presentations B. Weekly Paper Critiques, Reviews, and Discussions C. Writing assignments D. Research Proposal (Final Exam)
<b>Course Policies</b>	Class presence and participation are required for the PS303 course. Students are encouraged to actively participate in the discussion of research papers. Participation in class discussions is very important part of the learning process in the PS303 course. Students are evaluated on the quality of their contributions and insights. Quality comments offer different perspectives and move the discussion and analysis forward.
<b>Additional Information</b>	

## Tentative Course Schedule

*(Time, topic/emphasis & resources)*

<b>Week</b>	<b>Lectures</b>	<b>Topic</b>
1	Sun 01/22/2017 Tue 01/24/2017	Introduction to plant gene expression regulation
2	Sun 01/29/2017 Tue 01/31/2017	Presentations from selected key papers on gene expression regulation
3	Sun 02/05/2017 Tue 02/07/2017	Post-transcriptional gene regulation
4	Sun 02/12/2017 Tue 02/14/2017	Presentations from selected key papers on post-transcriptional gene regulation
5	Sun 02/19/2017 Tue 02/21/2017	Introduction to gene splicing
6	Sun 02/26/2017 Tue 02/28/2017	Presentations from selected key papers on gene splicing
7	Sun 03/05/2017 Tue 03/07/2017	Alternative splicing in plants
8	Sun 03/12/2017 Tue 03/14/2017	Presentations from selected key papers on alternative splicing in plants
9	Sun 03/19/2017 Tue 03/21/2017	Alternative splicing and abiotic stress
10	Sun 03/26/2017 Tue 03/28/2017	Key presentations on alternative splicing and abiotic stress responses
11	Sun 04/02/2017 Tue 04/04/2017	Plant adaptation to abiotic stresses
12	Sun 04/09/2017 Tue 04/11/2017	Presentations from selected key papers on plant adaptation to abiotic stresses
13	Sun 04/16/2017 Tue 04/18/2017	Epigenetics
14	Sun 04/23/2017 Tue 04/25/2017	Presentations from selected key papers on epigenetic regulation in plants
15	Sun 04/30/2017 Tue 05/02/2017	Research Proposal Defense I
16	Sun 05/07/2017 Tue 05/09/2017	Research Proposal Defense II
17	Sun 05/14/2017 Tue 05/16/2017	
18
