

Course Syllabus: Semiconductor Optoelectronic Devices - EE 208

Division	Computer, Electrical and Mathematical Sciences & Engineering
Course Number	EE 208
Course Title	Semiconductor Optoelectronic Devices
Academic Semester	Spring
Academic Year	2017/2018
Semester Start Date	01/28/2018
Semester End Date	05/24/2018
Class Schedule (Days & Time)	04:00 PM - 05:30 PM Sun Mon

Instructor(s)

Name	Email	Phone	Office Location	Office Hours
Jr-Hau He	jrhou.he@kaust.edu.sa	+966128084377		Tuesday 1pm-4pm

Teaching Assistant(s)

Name	Email
------	-------

Course Information

Comprehensive Course Description	Materials for optoelectronics, optical processes in semiconductors, absorption and radiation, transition rates and carrier lifetime. Principles of LEDs, lasers, photodetectors, modulators and solar cells. Optoelectronic integrated circuits. Designs, demonstrations and projects related to optoelectronic device phenomena.
Course Description from Program Guide	Materials for optoelectronics, optical processes in semiconductors, absorption and radiation, transition rates and carrier lifetime. Principles of LEDs, lasers, photodetectors, modulators and solar cells. Optoelectronic integrated circuits. Designs, demonstrations and projects related to optoelectronic device phenomena.
Goals and Objectives	<ul style="list-style-type: none"> -To introduce the history and development of optoelectronics -To inspire students toward optoelectronics research -To generate novel ideas from group discussion
Required Knowledge	Required Knowledge: Physics
Reference Texts	"Optoelectronics and Photonics: Principles and Practices," by S. O. Kasap, ISBN-10: 0132151499, Prentice Hall, 2013. "Optical Semiconductor Devices", by Mitsuo Fukuda, ISBN: 978-0-471-14959-0, Wiley
Method of evaluation	20.00% - Course Project(s) 30.00% - Final exam 20.00% - Homework /Assignments 30.00% - Midterm exam
Nature of the assignments	1. case study*1, 2. paper presentation*1, 3. written assignment*2

<p>Course Policies</p>	<p>Attendance Policy: Students are required to attend class, and attendance will be taken if necessary. 3 absences are allowed for documented personal/medical reasons. Please email me in advance if you know you will miss a class. However, on the exam dates listed in the course calendar, attendance is absolutely mandatory. No makeup exams will be given.</p> <p>Cheating Policy and Penalty for Cheating: Cheating is defined as “intentionally using or attempting to use, or intentionally providing or attempting to provide, unauthorized materials, information, or assistance in any academic exercise.” This includes any group efforts on assignments or exams unless specifically approved by the professor for that assignment/exam. Evidence of fabrication or plagiarism will also result in downgrading for the course. Students who cheat on any assignment or during any examination will be assigned a failing grade for the course.</p> <p>Feedback: I as well as the KAUST value your feedback in how we can make this course better and better serve your needs. - The standard KAUST course evaluations will also be given at the end of the term. - We may have midterm teaching evaluations of the course sometime in the middle of the semester. - Anonymous feedback can be posted anytime through blackboard. - If you have any personal issues with the course, please come to office hours or setup an appointment to speak with me individually</p>
<p>Additional Information</p>	<p>Written report in "Method of Evaluation" is the assignment after lab seccsion (4 times (5%*4)).</p>

Tentative Course Schedule

(Time, topic/emphasis & resources)

Week	Lectures	Topic
1	Sun 01/28/2018 Mon 01/29/2018	introduction of Semiconductor Optoelectronic Devices
2	Sun 02/04/2018 Mon 02/05/2018	fundamentals of semiconductor I: crystal structure and electron theory
3	Sun 02/11/2018 Mon 02/12/2018	fundamentals of semiconductor II: electronic structure
4	Sun 02/18/2018 Mon 02/19/2018	fundamentals of semiconductor III: carrier
5	Sun 02/25/2018 Mon 02/26/2018	PN-Junction
6	Sun 03/04/2018 Mon 03/05/2018	Light Emitting Diodes I
7	Sun 03/11/2018 Mon 03/12/2018	Light Emitting Diodes II
8	Sun 03/18/2018 Mon 03/19/2018	Photovoltaic Devices I
9	Sun 03/25/2018 Mon 03/26/2018	Photovoltaic Devices II
10	Sun 04/01/2018 Mon 04/02/2018	Spring break
11	Sun 04/08/2018 Mon 04/09/2018	midterm exam
12	Sun 04/15/2018 Mon 04/16/2018	Laser Diodes & Photodetectors
13	Sun 04/22/2018 Mon 04/23/2018	lab session I: PL & defects
14	Sun 04/29/2018 Mon 04/30/2018	Advanced Topics: 1) Photon management in optical devices; 2) PEC for water spitting
15	Sun 05/06/2018 Mon 05/07/2018	lab session II: Photodetector and PV characterizations
16	Sun 05/13/2018 Mon 05/14/2018	lab session III: Laser diode characterizations
17	Sun 05/20/2018 Mon 05/21/2018	lab session IV: LED characterizations
18		Final exam

Note

The instructor reserves the right to make changes to this syllabus as necessary.
